EDUCATION

Rajalakshmi Engineering College Chennai, India

B.Tech, Information Technology — 2nd Year | CGPA: 8.05 / 10

PROJECTS

Black Onyx: Provenance Firewall for AI Agents Future Forge Buildathon 2026 (National) - 1st Prize

- Built a provenance firewall for tool-using AI agents: every tool output carries source and trust labels, and a readable policy checks each sensitive argument, so untrusted data can never choose an action. 0 of 310 attack runs got through in the team's benchmark.
- Added Laya, a local 421M-parameter language model, as an advisory check on whether a tool call fits the user's request; 144 automated tests.

Tech: Python, YAML policy engine, Streamlit, pytest

FloodLine: Flood Risk & Alert System for Chennai Dreamovation 2.0 - Second Runner-up

- Built ward-level flood risk for 44 city wards from terrain data, with an LLM planner assisting operators while deterministic rules decide evacuation.
- Shipped an Expo phone app that answers questions offline using an on-device Llama 3.2 1B model; automated backend and phone tests.

Tech: FastAPI, React, Leaflet, React Native (Expo), Gemini API

Clinical Workup System for Audiologists Smart Ability Hackathon - 1st Place

- Won 1st place out of 13 teams (50+ teams overall) by designing and building an AI-assisted clinical workup system for audiologists, from test workflows to diagnostic support and report generation.
- Integrated the Gemini API to auto-draft clinical reports from test results; owned the full stack on a 3-person team.

Tech: Gemini API, Python (FastAPI), JavaScript

AI Code Vulnerability Detector & Fixer BUILDFEST '26 - 2nd Prize

- Placed 2nd out of 10+ teams with an AI tool that scans code, detects vulnerabilities and generates reviewable fixes with explanations (SecureWorldz sponsored prize).
- Built the scanning logic and the front end solo on a 3-person team.

Tech: Next.js, Gemini API, TypeScript

Client Projects (web and mobile) Client Work

- Delivered a bilingual (English/Arabic/Urdu) supply-chain and delivery ERP as one codebase on web and Android/iOS, with Supabase, delivery-certificate tracking and 19 client-specified reports.
- Built a bilingual course-registration and payment mobile app (card, bank transfer, installments) and a multi-currency price-comparison platform prototype with an admin portal.

Tech: React, TypeScript, Supabase, Capacitor, React Native (Expo)

Project EtherWave Personal Project

- Built solo an open-source, lossless audio streamer from Windows to any browser over Wi-Fi with sub-100ms latency, using WebSockets and the Web Audio API.

Tech: Python, JavaScript, WebSockets, Web Audio API

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C, SQL

Frameworks & Tools: React, Next.js, Node.js/Express, FastAPI, React Native (Expo), Supabase, PostgreSQL, Docker, Git/GitHub, Gemini API

ACHIEVEMENTS

- 1st Prize, Future Forge Buildathon 2026 (national level), Vels Institute - October 2026
- Second Runner-up, Dreamovation 2.0 Hackathon & Business Pitching, REC - October 2026
- 1st Place, Smart Ability Hackathon - August 2026 | 2nd Prize, BUILDFEST '26 - August 2026
- 1st Place, REC Capture & Code web competition - March 2026

LEADERSHIP & EXTRACURRICULAR

Film Club — Writing & Direction Rajalakshmi Engineering College

- Contributed as a member of the college Film Club, writing and directing scenes for student film projects.
